

## MASJENWERK: DRASAK

Voorkoms 50%

Werksgehalte 50%

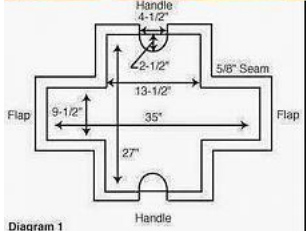

Diagram 1

### Vereistes:

Drasak vir 'n warm of koue bak of skottel.

### Werkswyse:

Geskikte duursame, wasbare en praktiese tekstielstof mag gebruik word met geskikte masjiengare. Enige vorm bv. rond, ovaal of reghoekig is toelaatbaar maar moet praktiese bruikbaar wees. Sterk drabande of handvatsels word aanbeveel. Drabande moet dubbeld wees indien van materiaal. Naaimasjien moet optimaal benut word om moeilikheidsgraad te verhoog. Watteersel of ander isolasietegnieke om bak warm of koud te hou sal praktiese gebruik verbeter. Steeklengte en steekspanning word bepaal deur die keuse van tekstielstof.

### Aanbieding

Bied aan in geskikte plastiese sak.

## SEWING: CARRYBAG

Appearance 50%

Workmanship 50%

### Requirements

Carry bag for a hot or cold casserole or container

### Workmanship:

Use durable, washable and practical textile fabric and suitable thread. Any shape eg. round, rectangular or oval is allowed but must be practical. Strong bands for carrying or a handle is recommended. Bands made from textile fabrics must be of double thickness. Sewing machine must be used optimally to improve the quality of workmanship. Padding or any other kind of isolation can enhance practical use. Stitch length and tension is determined by fabric choice.

### Presentation:

Present in a suitable plastic bag.
